

MEDICAL UNIVERSITY
of **SOUTH CAROLINA**
ANESTHESIA & PERIOPERATIVE MEDICINE

The Department of Anesthesia and Perioperative Medicine announces the opening of a new anesthesiology critical care fellowship at the Medical University of South Carolina (MUSC) in Charleston, South Carolina.

MUSC is a 750 bed tertiary care hospital with a Level I trauma center located in a thriving coastal community. Our fellowship provides superb training with a broad range of clinical experience and abundant research opportunities under the supervision of multidisciplinary critical care faculty. New ICU facilities include trauma, neurosciences, cardiothoracic, general surgical/digestive diseases, and pulmonary/medical units.

Our program offers an outstanding opportunity for fellows to train and excel while living in a city ideally suited to live, work and raise a family. Visit us online:

<http://www.musc.edu/anesthesia> or contact me at field@musc.edu or the program coordinator, Leslie Fowler, at fowlerl@musc.edu.

Sincerely,

Larry Field
